Overview

The U.S. Department of the Treasury's FY 2006 budget reflects the Department's commitment to the President's top policy priorities: promoting economic opportunity and ownership, protecting America and making government more effective.

The FY 2006 performance budget identifies the resources required to support Treasury's role as the steward of U.S. economic and financial systems, and as an influential participant in the international economy. The Department's budget allows Treasury to wage the financial war on terror, collect the nation's taxes, manage and account for the U.S. public debt, administer the Government's finances, regulate and supervise financial institutions and produce coins and currency.

Treasury's FY 2006 budget supports its strategic goals to promote financial security and promote prosperous

and stable economies at home and abroad, and to manage for results across the Department. This Budget in Brief requests funding for initiatives for the Department's offices and bureaus and provides additional detail about the total scope of Treasury budget activity.

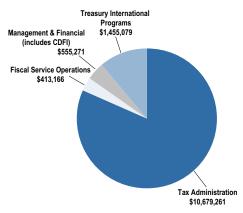

FY 2006 Budget Request

The FY 2006 request for appropriations for the Department of the Treasury totals \$11,647.7 million. This amount represents an increase of \$430.4 million over the FY 2005 enacted level, including supplementals, and reflects a 3.8 percent increase over the previous year. Treasury's budget funds its highest priority initiatives and reflects efforts to capitalize on efficiency and reinvest savings to fund initiatives wherever possible.

Proposed FY 2006 Treasury Appropriated Budget by Function

Ensure Financial Security

Managing the U.S. Government's finances effectively is key to the nation's financial security. Treasury's request provides \$10,679.3 million for the Internal Revenue Service (IRS) to ensure that the nation's taxes are collected fairly. Taxes on alcohol and tobacco products are collected by the Alcohol and Tobacco Tax and Trade Bureau (TTB), which conducts investigations in the commodities area. TTB requests \$91.1 million in funding in the FY 2006 budget.

The FY 2006 budget request includes investments for the Internal Revenue Service (IRS) to increase tax compliance through enforcement and infrastructure modernization. Both efforts are investments that ultimately increase federal revenues while also increasing essential simplification and fairness for taxpayers. Continuing to fund the modernization of the IRS infrastructure by deploying information technology is an important goal of the FY 2006 budget.

Treasury's request includes \$199.0 million to fund IRS' Business Systems Modernization efforts. These efforts to modernize the infrastructure require short-term expenditures that will be investments in long-term change and savings. Prior modernization initiatives at the IRS have already demonstrated results – eFile and eServices being two good examples of programs that work – and a continuing effort is central to the Department's pursuit of more fair and simple taxation.

Supporting enforcement initiatives is a critical part of increasing fairness in our tax system. Investing in enforcement is proven to increase revenues as well as long-term compliance. Treasury's budget includes a \$265 million increase for enforcement efforts that will work to close the tax gap between taxes paid and taxes owed.

Making tax preparation and filing less complicated is also a priority of Treasury's FY 2006 budget. The budget provides funding to directly impact the public through the promotion of increased electronic tax filing, which benefits taxpayers by improving the accuracy of filed returns, providing an acknowledgement that the return has been received by the IRS, and speeding the processing of refunds.

Treasury's budget contains funding to streamline payments and collections processes and invest in state-of-the-art technology to move toward an "all-electronic Treasury" where citizens can pay taxes, receive Federal payments and buy Treasury securities in a secure online environment.

The budget includes a request for \$236.2 million in appropriations for the Financial Management Service (FMS), which administers the Government's payments and collections systems. In 2004, FMS issued more than 705 million electronic payments and 235 million paper checks. FMS annually issues more than 940 million non-Defense payments valued at \$1.5 trillion, including Social Security benefits, tax refunds, and veterans' benefits.

The budget request also includes a request for \$176.9 million in direct appropriations for the Bureau of the Public Debt (BPD), which accounts for the nation's public debt and issues U.S. Government securities. The funding will allow BPD to continue to improve the efficiency of the securities services to customers by expanding TreasuryDirect, an investment system which will enable Treasury customers to manage their investment accounts online. Currently, the system includes more than \$1 billion in securities holdings.

Finally, to support the nation's financial system, it is essential that Treasury meets global demand for the world's most accepted coins and currency. Through the Bureau of Engraving and Printing (BEP) and the United States Mint, Treasury produces moneys that are distributed across the nation and around the globe

as a visible symbol of the United States. Treasury also continues to manufacture popular numismatic products and develop new designs of next generation currency to guard against counterfeiting. All 2006 nickels will commemorate the achievements of Thomas Jefferson, and during 2006, the United States Mint will also roll out the next installment of the popular 50 State Quarters® Program, with quarters for Nevada, Nebraska, Colorado, North Dakota and South Dakota.

Strengthen National Security

Financial security begins with a strong and safe nation. Treasury's request provides more than \$100 million to support the financial war on terror and fund key activities that thwart illegal financial activity around the globe, including strengthening Treasury's financial intelligence capabilities. Through its Office of Terrorism and Financial Intelligence (TFI), which was created in 2004, Treasury is at the center of the war against terrorist financing through its efforts to fight financial crimes, money laundering and terrorist financing across the globe.

Treasury's FY 2006 request includes increases for resources to enhance Treasury's analytical capability so that senior officials have access to actionable financial intelligence. The request also supports TFI by helping to create a 21st century information technology infrastructure to assist in the global fight against terror.

With improved capacity, TFI will more effectively pursue terrorist financing and have the ability to better support USA PATRIOT Act activities and curtail other illegal financial transactions.

Through this request, Treasury will improve its collaboration with international counterparts, increase anti-money laundering efforts, and improve Bank Secrecy Act oversight. This budget also supports the mission of the Office of Foreign Assets Control (OFAC) in administering international economic and trade sanctions and targeting international narcotics traffickers and other activity in violation of U.S. foreign policy and national security goals.

To support its efforts to increase anti-money laundering efforts and Bank Secrecy oversight,

Treasury's FY 2006 budget request also includes \$73.6 million for the Financial Crimes Enforcement Network (FinCEN).

Promote Economic Opportunity

Treasury supports the President's commitment to promoting economic opportunity and ownership by stimulating economic growth and promoting sensible economic policies that impact the domestic and international economy. In FY 2006, Treasury is requesting \$132.6 million in appropriations to support economic development activities.

The majority of these funds will support Treasury's policymaking activities. The request funds policy offices through which Treasury develops and implements policies that guide domestic economic development, tax programs, financial institutions and other fiscal matters. These policies are essential as Treasury works to simplify the U.S. tax code, improve the economies of distressed communities, and create a legal and regulatory framework that allows the nation's businesses to thrive.

A strong national economy must have a strong banking system. Treasury maintains the health of the national banking and thrift system through the Office of the Comptroller of the Currency (OCC) and the Office of Thrift Supervision (OTS). OCC and OTS protect the safety and soundness of national banks and thrifts through regulatory activities to ensure institutions are soundly managed and in compliance with consumer banking laws. OCC and OTS also contribute to the integrity of our financial institutions by working with FinCEN to enforce anti-money laundering laws and regulations.

Treasury is working with the Office of Management and Budget (OMB) and other agencies to streamline the Government's community development programs in order to maximize effectiveness. Treasury's FY 2006 budget includes a reduction of program funding for the Community Development Financial Institutions (CDFI) Fund. The request for \$7.9 million in direct funding in FY 2006 will ensure the administration of the New Markets Tax Credit Program (NMTC) and management of the existing awards under the Community Development Financial Institutions Program, the Bank Enterprise Award Program,

and the Native Initiatives Program. Other program funds will be consolidated with Federal community development programs within the Department of Commerce.

Treasury also promotes prosperity around the globe through its International programs. Contributions support the U.S. Government's participation in international financial institutions including the World Bank and the International Monetary Fund. Funding supports technical assistance to developing nations to strengthen their financial systems and support debt relief efforts for Highly Indebted Poor Countries (HIPC). The funding facilitates U.S. efforts to liberalize the financial aspects of trade and investment and provides millions of dollars in loans and grants to developing nations. This budget request includes \$1,455.1 million in funding for International programs, which is requested as part of the Foreign Operations, Export Financing, and Related Programs Appropriations Act.

Manage For Results

Treasury's budget includes funding requests to ensure that the Department remains a world-class organization and has the infrastructure it needs to operate effectively. The request provides a total of \$232.6 million to fund management priorities at the Department through the Departmental Offices (DO) and to ensure the Department continues to manage for results.

The proposed budget request includes \$7.9 million in new funding to provide for an improved technology infrastructure. This is essential for keeping pace with the Department's needs to enhance productivity, improve communication, interact effectively with the world-wide financial community, and to meet other management needs. Funding will be used to improve the Department's information technology (IT) infrastructure to ensure effectiveness in managing federal finances and combating financial crimes and terrorist financing.

The request also ensures that the Department will continue its major facilities projects and services for the Main Treasury and Treasury Annex buildings to ensure the safety and health of occupants and perform structural repairs and improvements.

Treasury's budget demonstrates its commitment to management priorities that improve transparency and accountability. The request includes a total of \$16.7 million to fund the Office of the Inspector General (OIG) and augment audit and investigative capabilities. It includes \$133.3 million to support the Treasury Inspector General for Tax Administration (TIGTA) and its efforts to oversee the nation's tax administration.

Finally, through its Franchise Fund, Treasury promotes excellence in its management by increasing competition for government and financial administrative services. Through its services provided to Federal agencies, the Franchise Fund lowers costs and delivers higher quality goods and services to its customers on a fee-for-service basis. Established in 1996 by Congress as a pilot project, the Franchise Fund was made permanent in 2004 through P.L. 108-447. It was recognized as a Center of Excellence in the Financial Management Line of Business by the Office of Management and Budget in 2004.
